Education

SOFTWARE ENGINEERING, CO-OP

University of Waterloo, 2019-2024

Skills

Languages Frameworks C, C++, Java, Node.JS, PHP, SQL, C#, Swift, Python, HTML, CSS, JavaScript OpenGL, Unity, Apache Tomcat, Selenium WebDriver, JUnit, jQuery, MySQL

Work Experience

JUNIOR DEVELOPER

Virtro Entertainment Inc., Jul - Aug 2018

- Ported and optimized The Station™ (Sci-Fi FPS Indie Game) into PlayStation VR, Oculus Rift and HTC Vive mainly by exploiting Unity's different lighting techniques.
- Developed Virtro Attendance (Slack-integrated application) to automate the manual payroll system and to keep track of team's attendance and leaves. Implemented RESTful API for Slack communication.

SOFTWARE DEVELOPER, QUALITY ASSURANCE

HeadCheck Health, Aug 2017

- Led the development of an automated customer registration software which drastically reduced
 the redundancy (from taking days to ~10 min.) in the registration process of new teams and
 athletes for a prospective concussion-diagnostics software startup.
- Worked with the QA team to create and implement JUnit test cases for iOS, Android and web using Java and Selenium WebDriver

Projects

VR WIZARD CHESS (LINK)

Hack the North, Sep - Dec 2018

- Recreated "Wizard Chess" from the Harry Potter series in VR using Unity.
- Utilized IBM Watson's speech-to-text technology for giving orders to the chess pieces.
- Awarded Winner/Finalist of Hack the North 2018.

REACTOR ENGINE (LINK)

Personal Project, Sep 2016 - Mar 2017

- Developed a game engine for Mac OS X that utilizes OpenGL to render 3D models with a scripting framework built with C++.
- Implemented entity-component-system framework to structure the designing of game objects.

KINDLERS NETWORK (LINK)

REMSS Kindlers Society, Jul 2016 - Jun 2017

Created a web application using PHP and MySQL for the organization members (over 100) to sign
up and check the volunteer hours, and for executive members to manage the volunteer events.
